

PHYSICS- USPEKHI

English edition of *Uspekhi Fizicheskikh Nauk*
May 2006 Volume 176 Number 5

Contents

Volume 49 Number 5 2006 Pages 441 – 550	REVIEWS OF TOPICAL PROBLEMS	
	Superconductivity of repulsive particles	441
	V I Belyavsky, Yu V Kopaev	
	The mechanism for the primary biological effects of ionizing radiation	469
	V M Byakov, S V Stepanov	
	Self-reversal of the magnetization of natural and synthesized ferrimagnets	489
	V I Trukhin, N S Bezaeva	
	METHODOLOGICAL NOTES	
	The interaction energy of electric multipoles in a plane and a point-multipole approximation for the electric field of conductors	517
	V P Kazantsev, O A Zolotov, M V Dolgopolova	
	Spatial configuration of light at consecutive nonlinear optical conversions	523
	A V Belinsky, A V Isaeva, E V Makeev, A A Novikov	
	FROM THE HISTORY OF PHYSICS	
	One of Gibbs's ideas that has gone unnoticed (comment on chapter IX of his classic book)	531
	A D Sukhanov, Yu G Rudoï

Contents continued

CONFERENCES AND SYMPOSIA

**Joint scientific session of the Physical Sciences Division
of the Russian Academy of Sciences
and the Joint Physical Society of the Russian Federation
'Backward waves' (25 January 2006):** 537

Forward and backward noncollinear waves in magnetic films 537
A V Vashkovsky, E H Lock

Electromagnetic waves in artificial periodic structures 542
R A Silin

PERSONALIA

In memory of Viktor Grigor'evich Lifshits 547
V A Akulichev, A F Andreev, S V Gaponov,
V Yu Glushchenko, Yu N Zhuravlev, V I Sergienko,
L V Keldysh, V B Timofeev

Physics news on the Internet 549
